EXECUTIVE SUMMARY

Technology and product executive with 20+ years in enterprise software. Six years as CPTO of CluedIn, holding both the CTO and the CPO scope: co-founder and board member, I led a 40-person product and engineering organisation (30 engineers), with everyone in product and technology reporting to me, as the company grew to around US$6M ARR.

Today Head of AI and Business Transformation at Vertuoza, reporting to the CEO, with a company-wide mandate to change how a 30-engineer organisation ships software: median time to market went from 65 days to 6. I came up through engineering, as lead developer and principal architect, before running the organisation.

SELECTED OUTCOMES

- Vertuoza — median time to market cut from 65 days to 6; 10× more pull requests with the same human review on every one
- CluedIn — multi-tenant SaaS platform delivered in 4 months (PaaS-to-SaaS transformation); customer onboarding cut from 3 months to days
- CluedIn — grew to around US$6M ARR with regulated enterprise customers at an average ACV of 300k+
- CluedIn — 80% customer adoption of new AI features within 6 months; time to launch an AI agent cut from weeks to hours

CORE COMPETENCIES

- Engineering organisation leadership · Product strategy & roadmap · Platform & SaaS architecture
- Hiring & performance management · Delivery governance · Pricing & enterprise deal support
- Production AI & agentic workflows · AI-assisted engineering · Greenfield & brownfield modernisation

PROFESSIONAL EXPERIENCE

Head of AI and Business Transformation — Vertuoza, Belgium | 2026 – Present

B2B construction-management SaaS platform · Reports to the CEO · Company-wide mandate across 30 engineers, 4 product managers and 2 designers

- Mandate from the CEO: transform how the company builds and delivers with AI, across engineering, platform architecture and product.
- Created Omni-loop, the delivery framework the teams use to ship with coding agents under human review: median time to market from 65 days to 6, 10× more pull requests, 40% of merged work written by agents.
- Brought AI Advisor and Model Context Protocol (MCP) capabilities into production with the Platform team; automated support and bug fixing with AI.

Chief Product & Technology Officer (CPTO) — CluedIn, Brussels | 2020 – 2026

Enterprise data management & AI platform · Regulated enterprises · ACV 300k+ · Around US$6M ARR · SOC 2 Type II

- **Organisation.** Led a 40-person product and engineering organisation (30 engineers, product, design and support). Everyone in product and technology reported to me, including the team leads. Final interviewer for every engineering and product hire; ran performance management, delivery and operating rhythms across product, engineering and support.
- **Company.** Co-founder and board member, reporting to the CEO; part of the leadership team that grew the company to around US$6M ARR.
- **Engineering.** Led the multi-tenant SaaS transformation, delivered in 4 months, cutting customer implementation from around 3 months to a few days through automation and phased rollout. Operated the platform for regulated enterprise customers under SOC 2 Type II, with a 4-hour incident response commitment.
- **Product.** Owned product strategy and roadmap; co-designed SaaS and AI pricing with Sales leadership; contributed to major enterprise deals and renewals; built the customer health scoring used by Product, Support and Customer Success.
- **AI.** Built agentic AI workflows with Azure OpenAI and Ollama, with reusable deployment patterns, auditability, testing and rollback; launch time went from weeks to hours and new AI features reached 80% customer adoption in 6 months.

Principal Architect — Adform, London | 2016 – 2020

Cross-product architecture for a complex enterprise advertising platform.

- Led a platform-wide initiative to unify UX and UI across product verticals, and set the shared front-end architecture principles used by the product teams.
- Advanced API unification across business units through GraphQL federation and clearer cross-layer data contracts.
- Contributed to Adform FLOW; the broader initiative later received a Red Dot award for interface and user experience.

Lead Developer — Sitecore, Copenhagen | 2012 – 2016

Built shared platform capabilities within Sitecore's innovation team to support its evolution from CMS to a broader digital suite.

- Helped build SPEAK, a front-end and back-end framework in .NET and TypeScript used to accelerate development of vertical applications across Sitecore.
- Enabled internal teams and partners to build applications on a shared framework foundation, and worked with evangelists and development teams on adoption.
- Technical referent for engineering hiring: interviewed and assessed engineering candidates.

VP Product Development — Amilia, Montreal | 2010 – 2012

- First executive engineering role: led the development team of a SaaS application across hiring, team growth, execution and delivery.
- Owned architectural direction of the web application, balancing scalability, maintainability and product evolution.
- Partnered with Product and Sales on priorities and roadmap; built and structured the team to meet delivery commitments.

Earlier Engineering & Leadership Roles — Brussels | 2005 – 2009

Aubay (AG Insurance) · Genivar · Experteam (BNP Paribas Fortis) · SME IT consulting

---

TECHNOLOGY

- Architecture & cloud — Multi-tenant SaaS, API architecture, GraphQL federation, Azure, Google Cloud Platform (GCP), Kubernetes, CI/CD, IaC
- AI in production — Agentic workflows, Azure OpenAI, Ollama, Model Context Protocol (MCP), auditable deployment, testing and rollback
- Data & software — SQL, Elasticsearch, Neo4j, Microsoft Fabric, TypeScript, Node.js, React, Python
- Still hands-on — Claude Code and AI coding agents, OpenRouter, Mastra, Inngest

---

EDUCATION & LANGUAGES

- Master in Computer Science — ISIMS, Mons, Belgium
- French Native · English Fluent · Dutch Basic
